Felipe Jorge

Junior Back-end Developer | Go (Golang) · Python · Java | Microservices · REST APIs · Applied AI (LLMs and Agents)

Greater São Paulo, Brazil (remote, hybrid or on-site) | felipevwgs@gmail.com | linkedin.com/in/felipe-jorge-lopes | github.com/felipeirl

PROFESSIONAL SUMMARY

Junior Back-end Developer shipping production code at PicPay (fintech), working on Go (Golang) microservices for the marketplace purchase flow (e-commerce). Stack: Go (Gin), Python (FastAPI), Java (Spring Boot), REST APIs, MongoDB, PostgreSQL, Redis, Docker, Kubernetes, CI/CD with GitHub Actions and GitOps with ArgoCD on AWS. Integrates AI into back-end systems: LLM APIs, prompt engineering, agents with LangChain and LangGraph, guardrails and recommendation with Laya (open-source decision model). Working familiarity with React and TypeScript. Seeking a Junior Back-end, Go, Python or Java Developer role, or Junior AI Engineer role, at fintechs, banks, e-commerce and technology companies.

TECHNICAL SKILLS

Languages: Go (Golang), Python, Java, SQL, TypeScript (working familiarity)
Frameworks: Gin, FastAPI, Spring Boot, React (working familiarity)
Back-end and Architecture: Microservices, REST APIs, Clean Architecture, Modular Monolith, Automated testing, Code review
Databases: MongoDB, PostgreSQL, Redis, SQL and NoSQL data modeling
DevOps and Cloud: Docker, Kubernetes, CI/CD, GitHub Actions, GitOps, ArgoCD, AWS, Linux, Git, Jira
Applied AI: LLM API integration, Prompt engineering, AI agents (LangChain, LangGraph), RAG (study projects), Guardrails, Recommendation systems, Laya, AI-assisted development workflow
Methodologies: Scrum, Agile, daily stand-ups, sprint planning

PROFESSIONAL EXPERIENCE

Development Assistant (Back-end) | PicPay, São Paulo, Brazil
Feb 2026 - Present | Part-time | Shop E2E squad: marketplace purchase flow in the PicPay app

- Develop and maintain Go (Golang) microservices for e-commerce, using MongoDB and Redis.
- Ship code to production, with code review as both author and reviewer.
- CI/CD with GitHub Actions and Kubernetes deployments via GitOps (ArgoCD) on AWS.
- Fix bugs and take part in the squad's agile ceremonies (dailies, planning).
- Took part in PicPay's internal Hackathon.
- **Stack:** Go · MongoDB · Redis · Docker · Kubernetes · ArgoCD · GitHub Actions · AWS · Jira

IT Assistant | PicPay, São Paulo, Brazil
Oct 2025 - Feb 2026 | Part-time

- Technical onboarding on the squad stack: Go, MongoDB, Docker, microservices architecture and delivery workflow.

EDUCATION

Technical Diploma in Information Technology | Instituto J&F (Germinare Tech)
Expected graduation: Dec 2027
DevOps, Software Engineering, Artificial Intelligence, Mobile Development, Business Intelligence (BI), Java, TypeScript, SQL Data Modeling, NoSQL Databases (MongoDB, Redis, Neo4j).

ADDITIONAL INFORMATION

- **Currently learning:** AI agents with LangChain and LangGraph; mobile development with Kotlin and Jetpack Compose.
- **Languages:** Portuguese (native); English (intermediate, technical documentation reading).
- **Recognition:** PicPay internal Hackathon.
